Lyfthaus

Lyfthaus have a well proven team of experienced and innovative design engineers and creative thinkers who deal solely with the stylish and refined tastes of architectural clients. Placing their clients' needs at the heart of every design, the Lyfthaus objective is to exceed clients' expectations, delighting them by providing an individual and unique service that delivers an uncompromisingly high standard of design, fit and finish to every project.

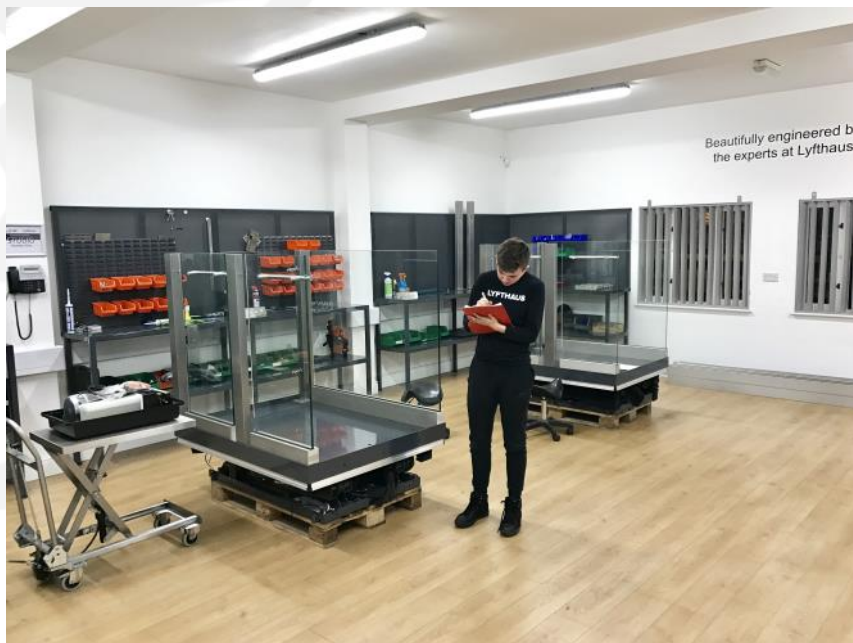

Lyfthaus designs are never about us. Our clients are our focus. Our designers are not only passionate, skilled and experienced, but are excellent listeners and communicators. We take the time to thoroughly understand our clients and what they want from each individual platform lift project. Only then do we start to think about the design itself.

We are the lift industry's foremost creative designers providing architects with an unparalleled freedom of choice and the source of the very best architecturally inspired platform lift design solutions. The Lyfthaus team develop trusted relationships that see clients returning time after time, year after year.

We combine stimulating new trends and finishes with a client's key requirements to guarantee a design that is exclusive, reflecting their own property style and requirements.

Lyfthaus offers expert knowledge and advice, using tailor made designs, hand-crafted studio based manufacturing methods and luxury finishes enabling clients to realise the full potential of their new bespoke platform lift.

Lyfthaus premium open aspect platform lifts can be found in Britain's finest buildings, architectural icons and A-list properties.

Lyfthaus

Studio One at the Lyfthaus Technology Centre, Nr. Cambridge

Platform Lift Couture

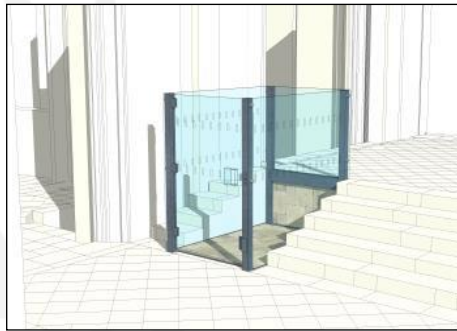

Situated in one of London's most exclusive addresses this Autograph model TB2000 features a custom metallic champagne finish to complement the exterior of the property.

LiftHaus

From Architect's Concept Sketch to Completion

Working in close liaison with the architect and client under very strict design guidelines this stunning CUBE model was developed. A beautiful example of a lift that remains honest to the original architecture within a wonderful A-list property.

Platform lift Couture

Designed to complement the built environment and enhance disabled people's lives.

This through car configuration lift features black perforated square punched sheet steel gates and barriers to complement the exposed ironwork of the industrial style interior design of this Digital District office space.

LiftHaus

This CUBE travels within a frameless glass enclosure and is fitted with a 70mm deep platform tray which accommodates hand-cut, Italian marble.

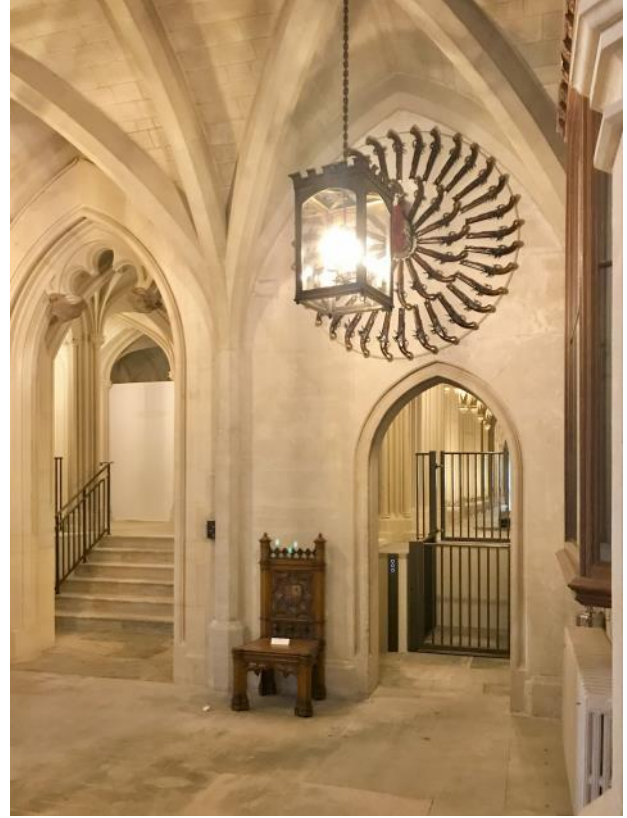

LiftHaus

LiftHaus

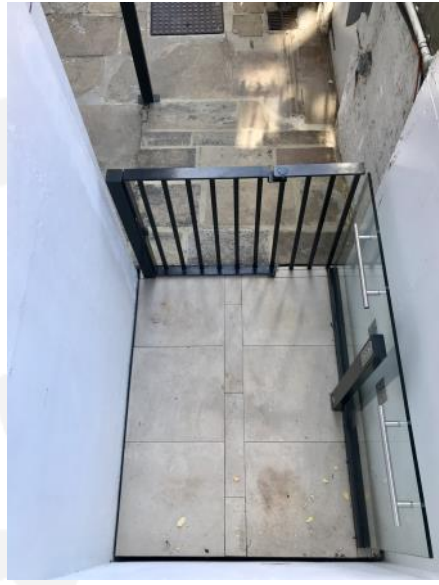

This pair of bespoke heritage lifts has been designed to complement the interior of this architectural A-lister perfectly with the clever use of bronze metallic PPC finishes with real bronze capping. The balustrade matches the design used elsewhere within the property and the stone flooring follows seamlessly into the platform. This grade 1 listed building is now fully accessible yet doesn't distract or draw attention from the splendour of the adjacent architecture. These lifts were designed in close consultation with the project team.

We rise by lifting others

Heritage Collection

LiftHaus

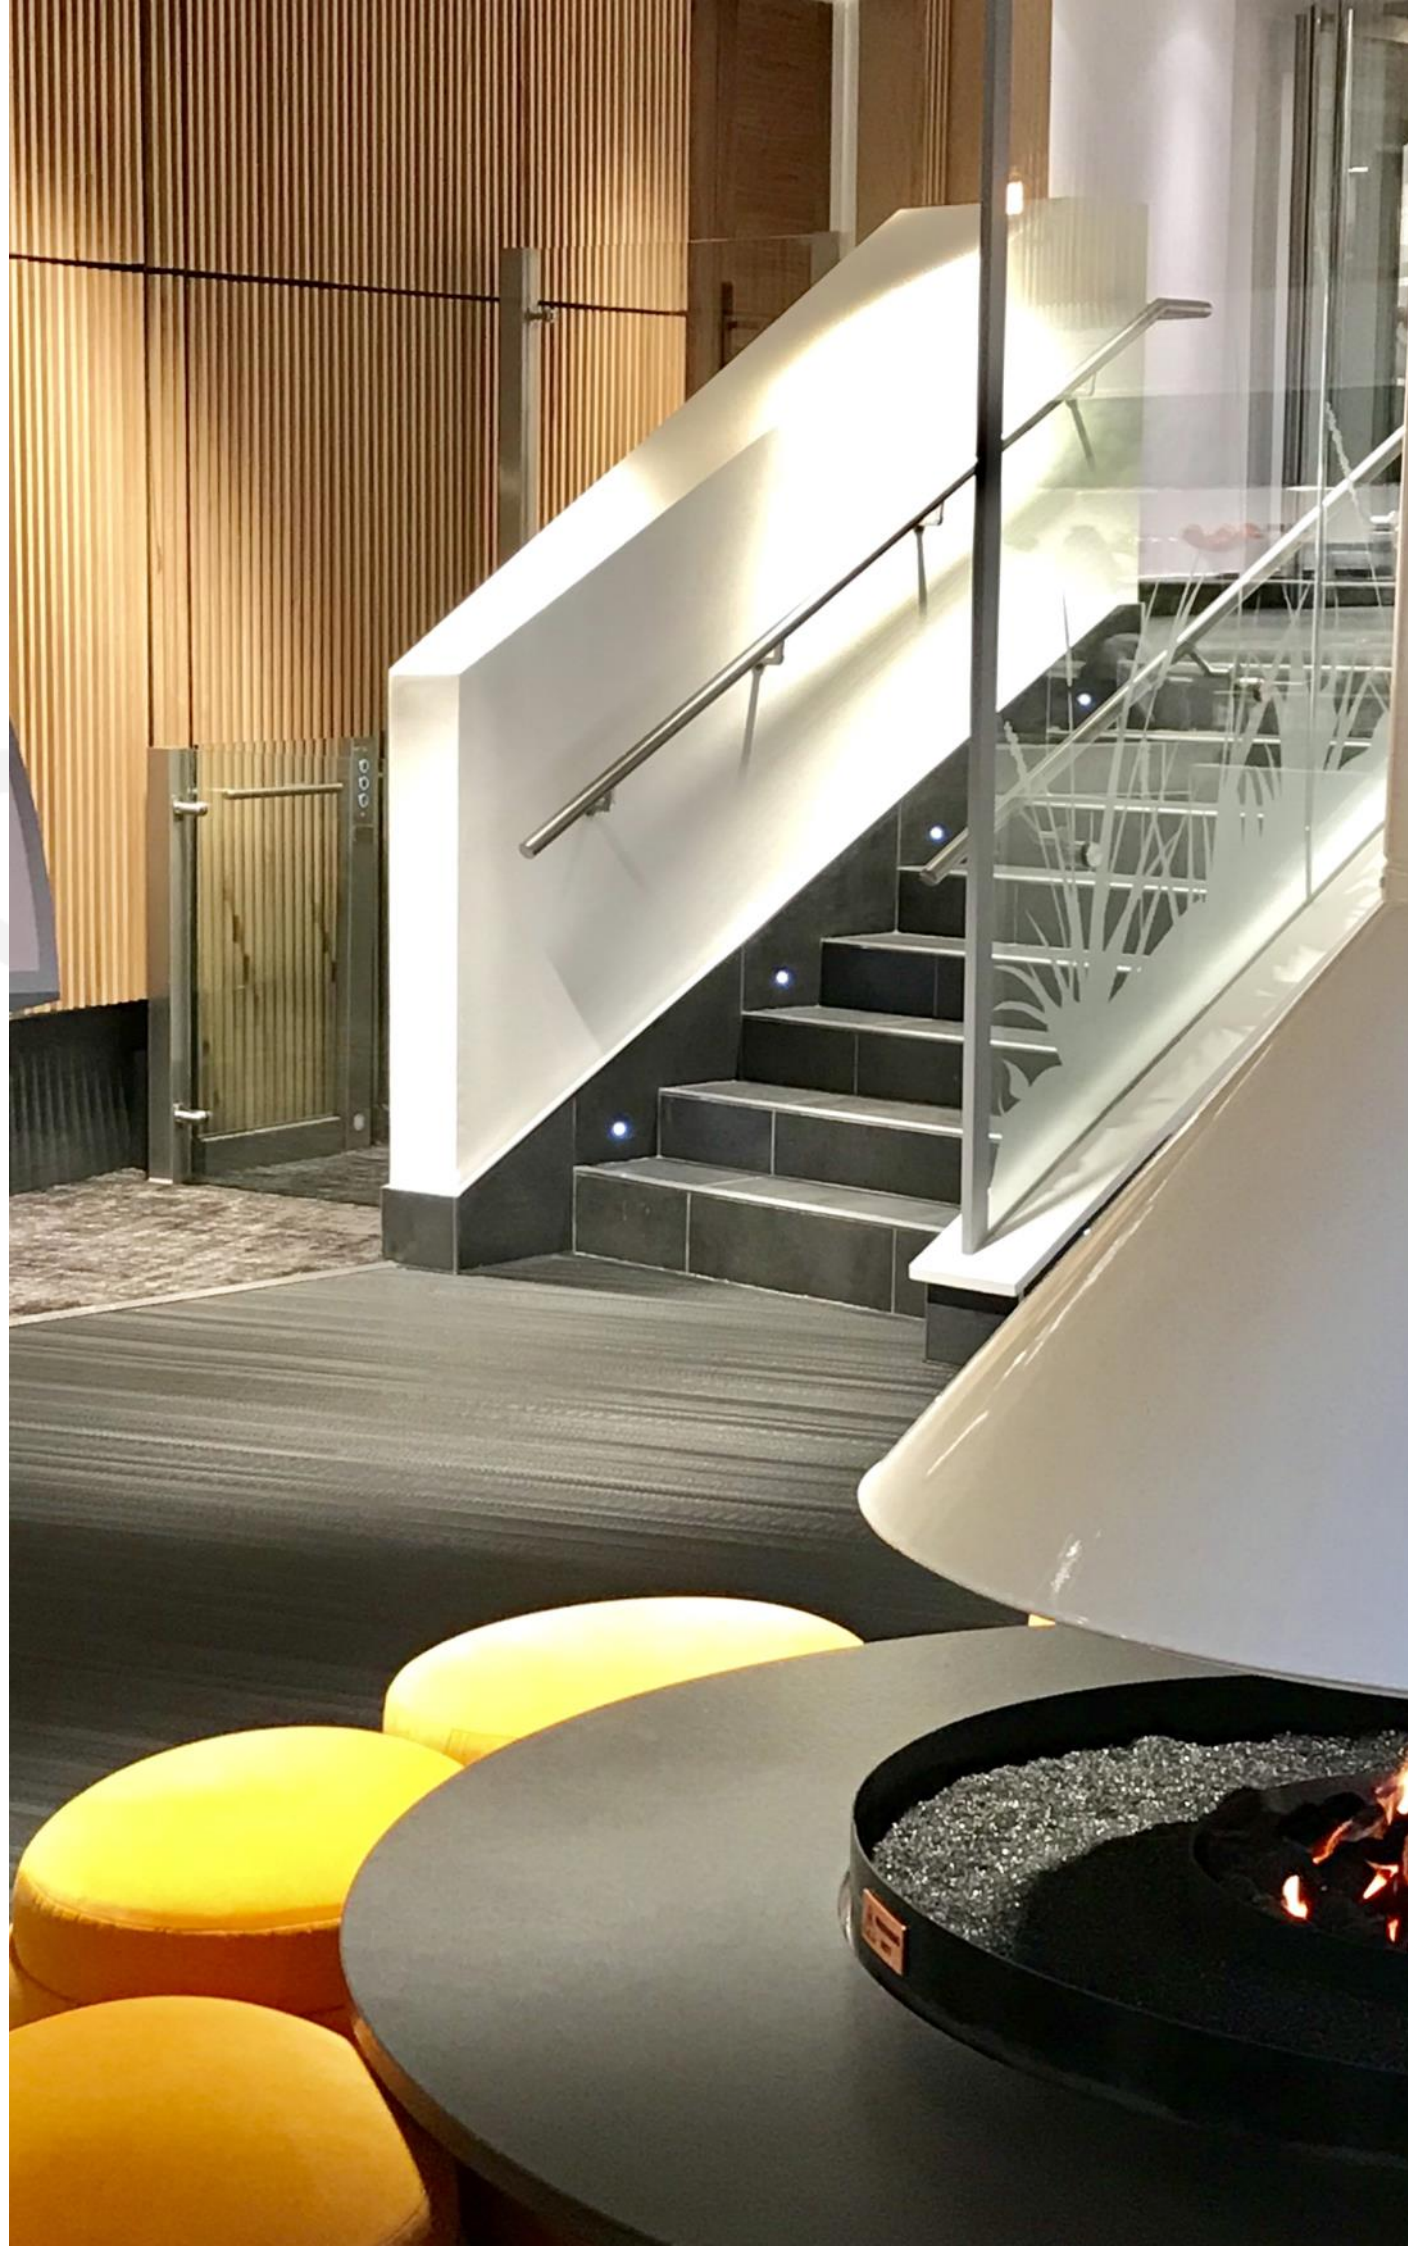

A very challenging installation within a very restricted site. This three stop, three entrance point lightwell lift features gates and balustrades that complement the original Victorian wrought ironworks perfectly. The lift is exceptionally discreet, and dissolves into its backdrop beautifully. This was an essential part of the planning consent due to the historic importance of this location which is often used for period television and film including Downton Abbey and the latest Wonder Woman movie.

All our platform lifts are unique but this installation really is something very special. The gates and balustrades are constructed using a casting taken from an original cast iron gate believed to have been produced in the 15th century from the remnants of French battleship cannons. Our exact replicas have been perfectly reproduced in aluminium. This stunning design is reminiscent of a portcullis complete with castellations and spearhead detailing. These castings have been expertly crafted to form modern interlocked gates with brass push stations and down lighters. The platform is set with stone and the scissor mechanism is protected with a concertina bellow skirt.

LiftHaus

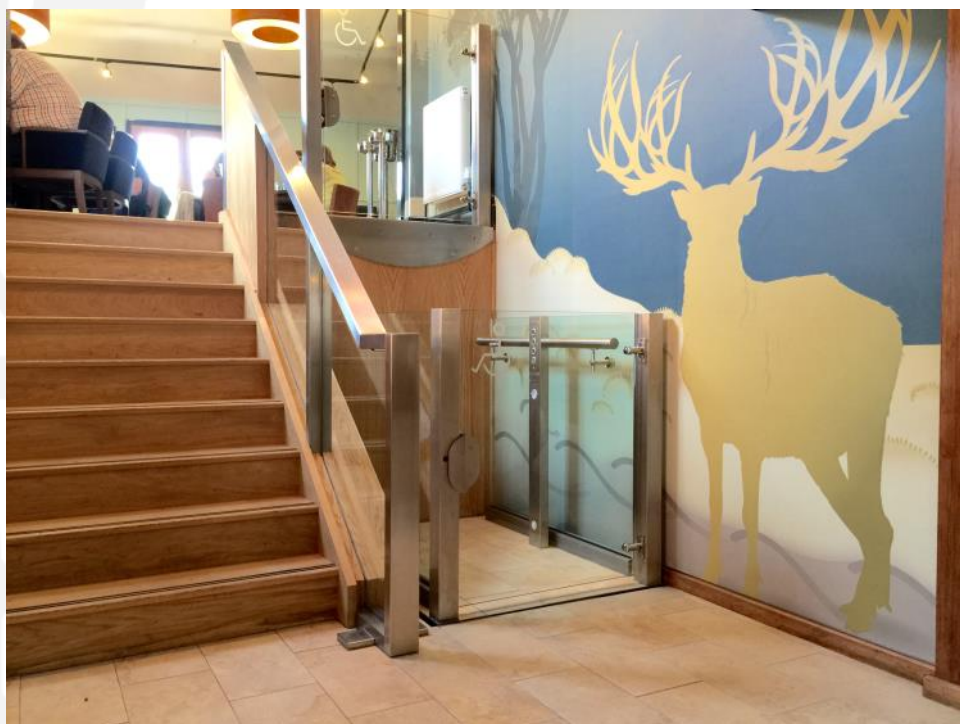

This lift is linked to the automatic full height upper level door and is connected to the building's access control system. The complete unit is suspended over the lightwell in a 100mm deep tray mounted on I-beams below.

LiftHaus

Lyfthaus

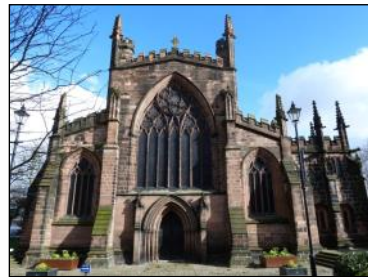

This church in London's East End has been the backdrop for many TV shows and movies. The platform lift had to blend seamlessly with the grade I listed building, the result is stunning. Lyfthaus even reproduced the curved upper level gate with Greek detailing

This platform lift in a popular restaurant was one of our first installations and uses a tiled platform tray and glass gates and barriers which ensures it doesn't distract from the beautiful interior design.

LiftHaus

Cathedrals and churches are very important community hubs. The introduction of a platform lift ensures everyone can enjoy the churches' facilities. This Autograph TM1500 is inset with York stone.

LiftHaus

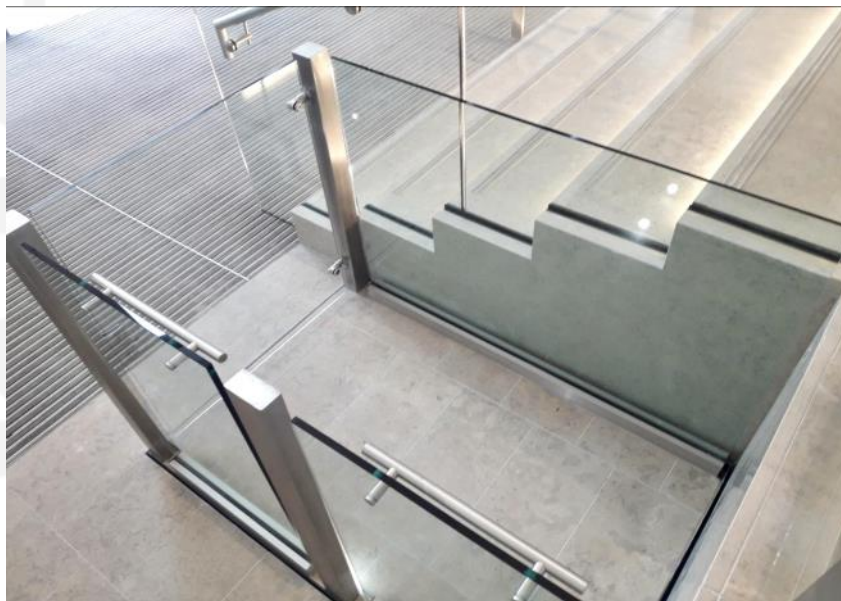

LiftHaus

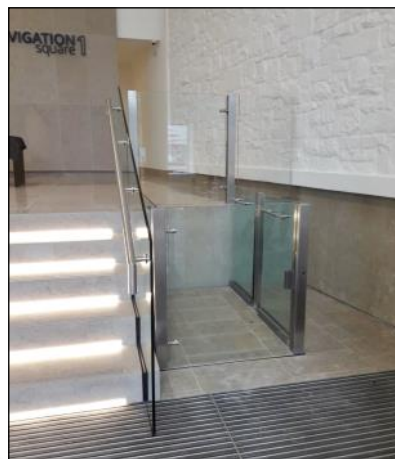

Hidden under powered hatch doors in the courtyard of this grade one architectural gem is this exceptionally discreet lift which is only revealed when it starts to elevate from its subterranean storage space. Once at ground level the lift is used as a conventional platform lift.

Lyfthaus

Located in central Cork, Ireland, 1 Navigation Square is a superb example of a commercial urban development of style and substance. The new Lyfthaus platform lift is no exception to this. Beautifully discreet with clean lines that flow throughout the ground floor reception area.

Working closely with the architect and builders Lyfthaus developed this floor to floor shaft enclosed platform lift which is installed within a prestigious Cambridge college. The oak lined enclosure uses stainless steel glide plates to stabilise the platform which is used for disabled access and catering supplies.

LiftHaus

This is one of six stadium compliant lifts installed at Old Trafford, home of Manchester United FC to help increase their wheelchair capacity to 300 spaces.

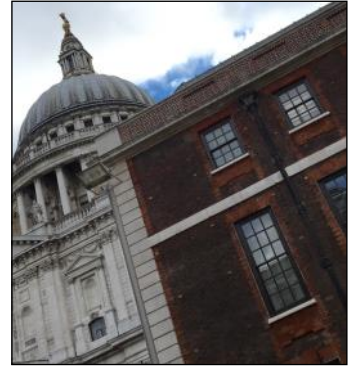

Our through-floor lift with a 3M travel and frameless perimeter glass enclosure at the upper level. The lift is designed not to distract from the immediate architecture.

LiftHaus

Lytthaus

As featured in an extensive article in Elevator World Magazine, this Heritage model is located at Sir Christopher Wren's Chapter House at St. Paul's Cathedral. To ensure historical accuracy we cast the finials and spearheads from Sir Christopher's originals!

Lythaus

Lyfthaus

This Lyfthaus Autograph model takes pride of place within the Media Café of London's newest super stadium which is home to Tottenham Hotspur's FC. The lift has tiled flooring to match adjacent surfaces and a chain mail protective skirt to mask the scissor mechanism.

Platform lift Couture

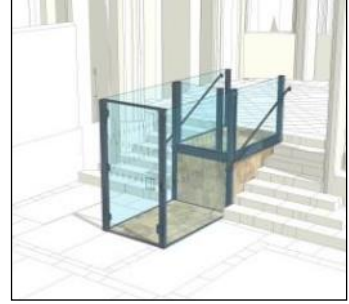

A glass dividing screen separates and protects the lift from the steps. The lift has a 100mm deep platform tray to accommodate a pour polished concrete finish. This Autograph model has controls integrated into the grab bar.

LiftHaus

Lyfthaus

From architect's vision to completion.
The original design intent sketch.

As part of a major refurbishment and conservation programme a new creative direction for this cathedral's disability access was agreed. A bold approach that would be honest to the building's stunning architecture and would reflect the centuries of innovative architectural design. This brave and contemporary platform lift was chosen which includes a Lyfthaus bridging link. We are thrilled with the results.

Finished in a bronze metallic pearlescent powder coat with bronze buttons this TBD2000 complements the bronze fin screens in this reception area perfectly. An upper level balcony style gate matches beautifully.

LiftHaus

Architects are our products' principle specifiers. Keeping up with continually evolving architectural trends is essential.

Platform lift Couture

All the materials including the fretwork design, steel angles and sections were specified by the architectural and interior design team for this “one-off” platform lift creation. This very special lift complements the interior styling perfectly.

LiftHaus

Lyfthaus Connex has been designed for low rise access below 500mm of travel within prestige property. This highly adaptable lift can be clad with your own choice of material to complement your interior styling. This includes: stone, slate, tiles, marble, carpet and wood.

The platform size and configuration will be designed to suit your space. All lifts have integrated automatically rising edge protection. Options include grab bars with integral controls and low level barriers for open applications and independent use.

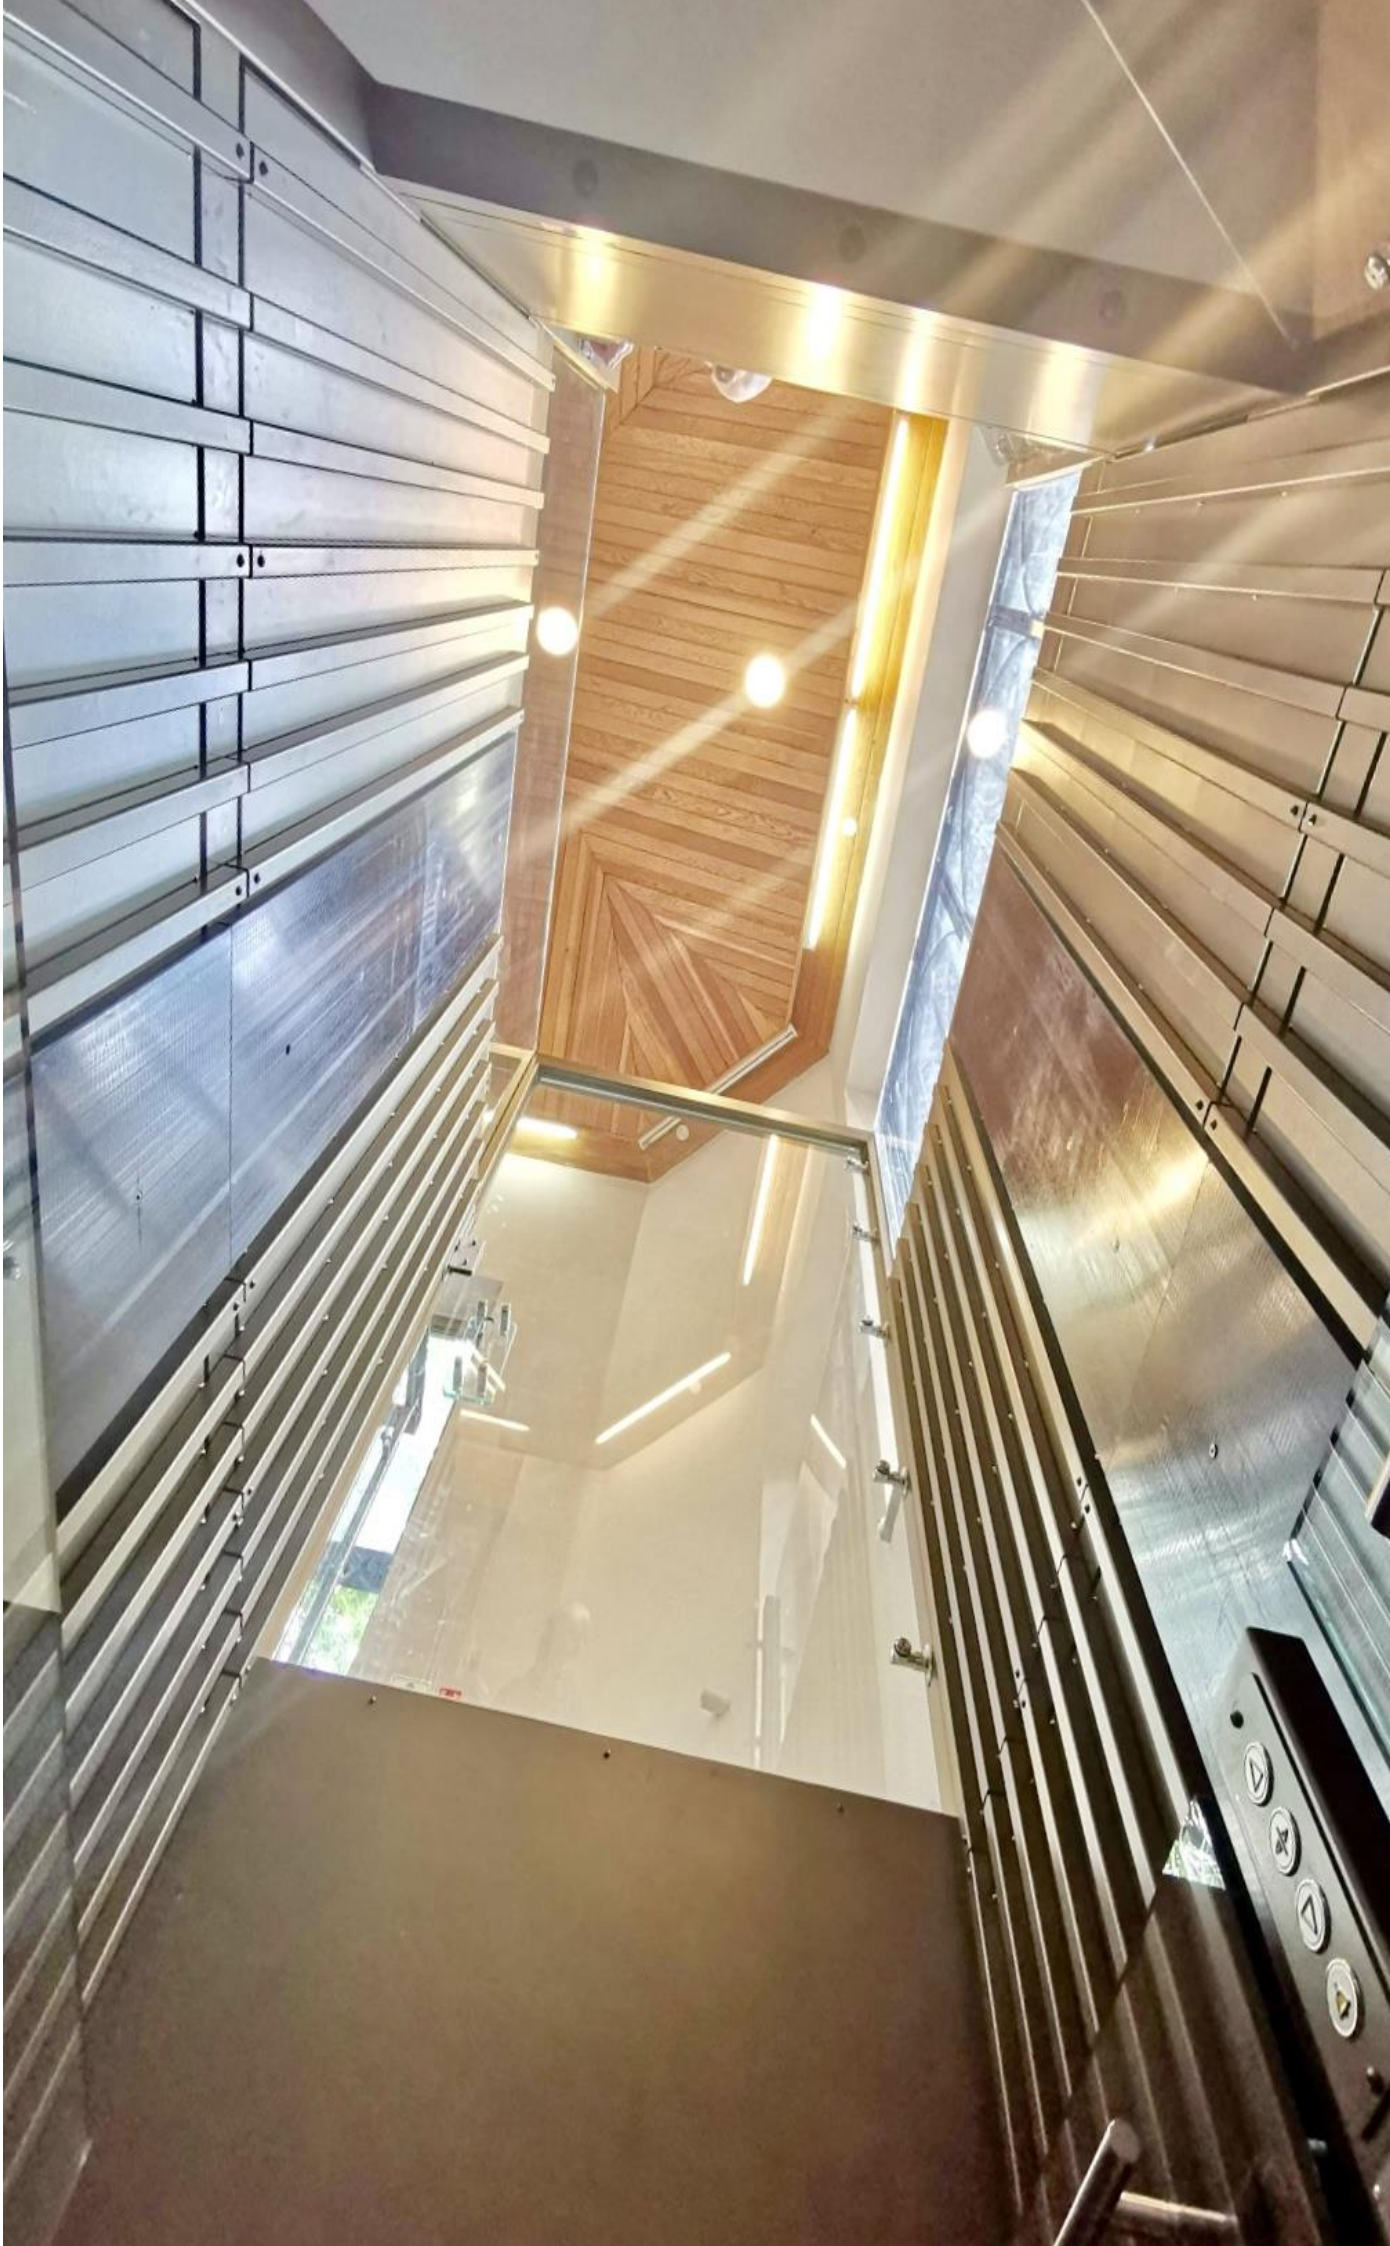

Lyfthaus

Metallic finishes available including stainless steel, bronze, brass and copper

CUBE Collection

Lylthaus

This lightwell basement lift transports patients from street level up to entrance level and also down to basement level - one below zero. We have adapted the original street level balustrade to form an unobtrusive interlocked gate.

Disabled access into this smart London hotel is provided by this super discreet Autograph platform lift. The lift is also used to transport catering supplies and general goods such as laundry trolleys.

LiftHaus

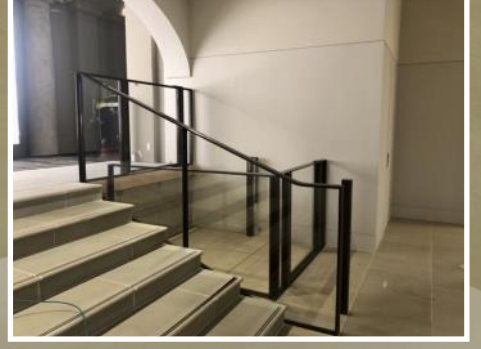

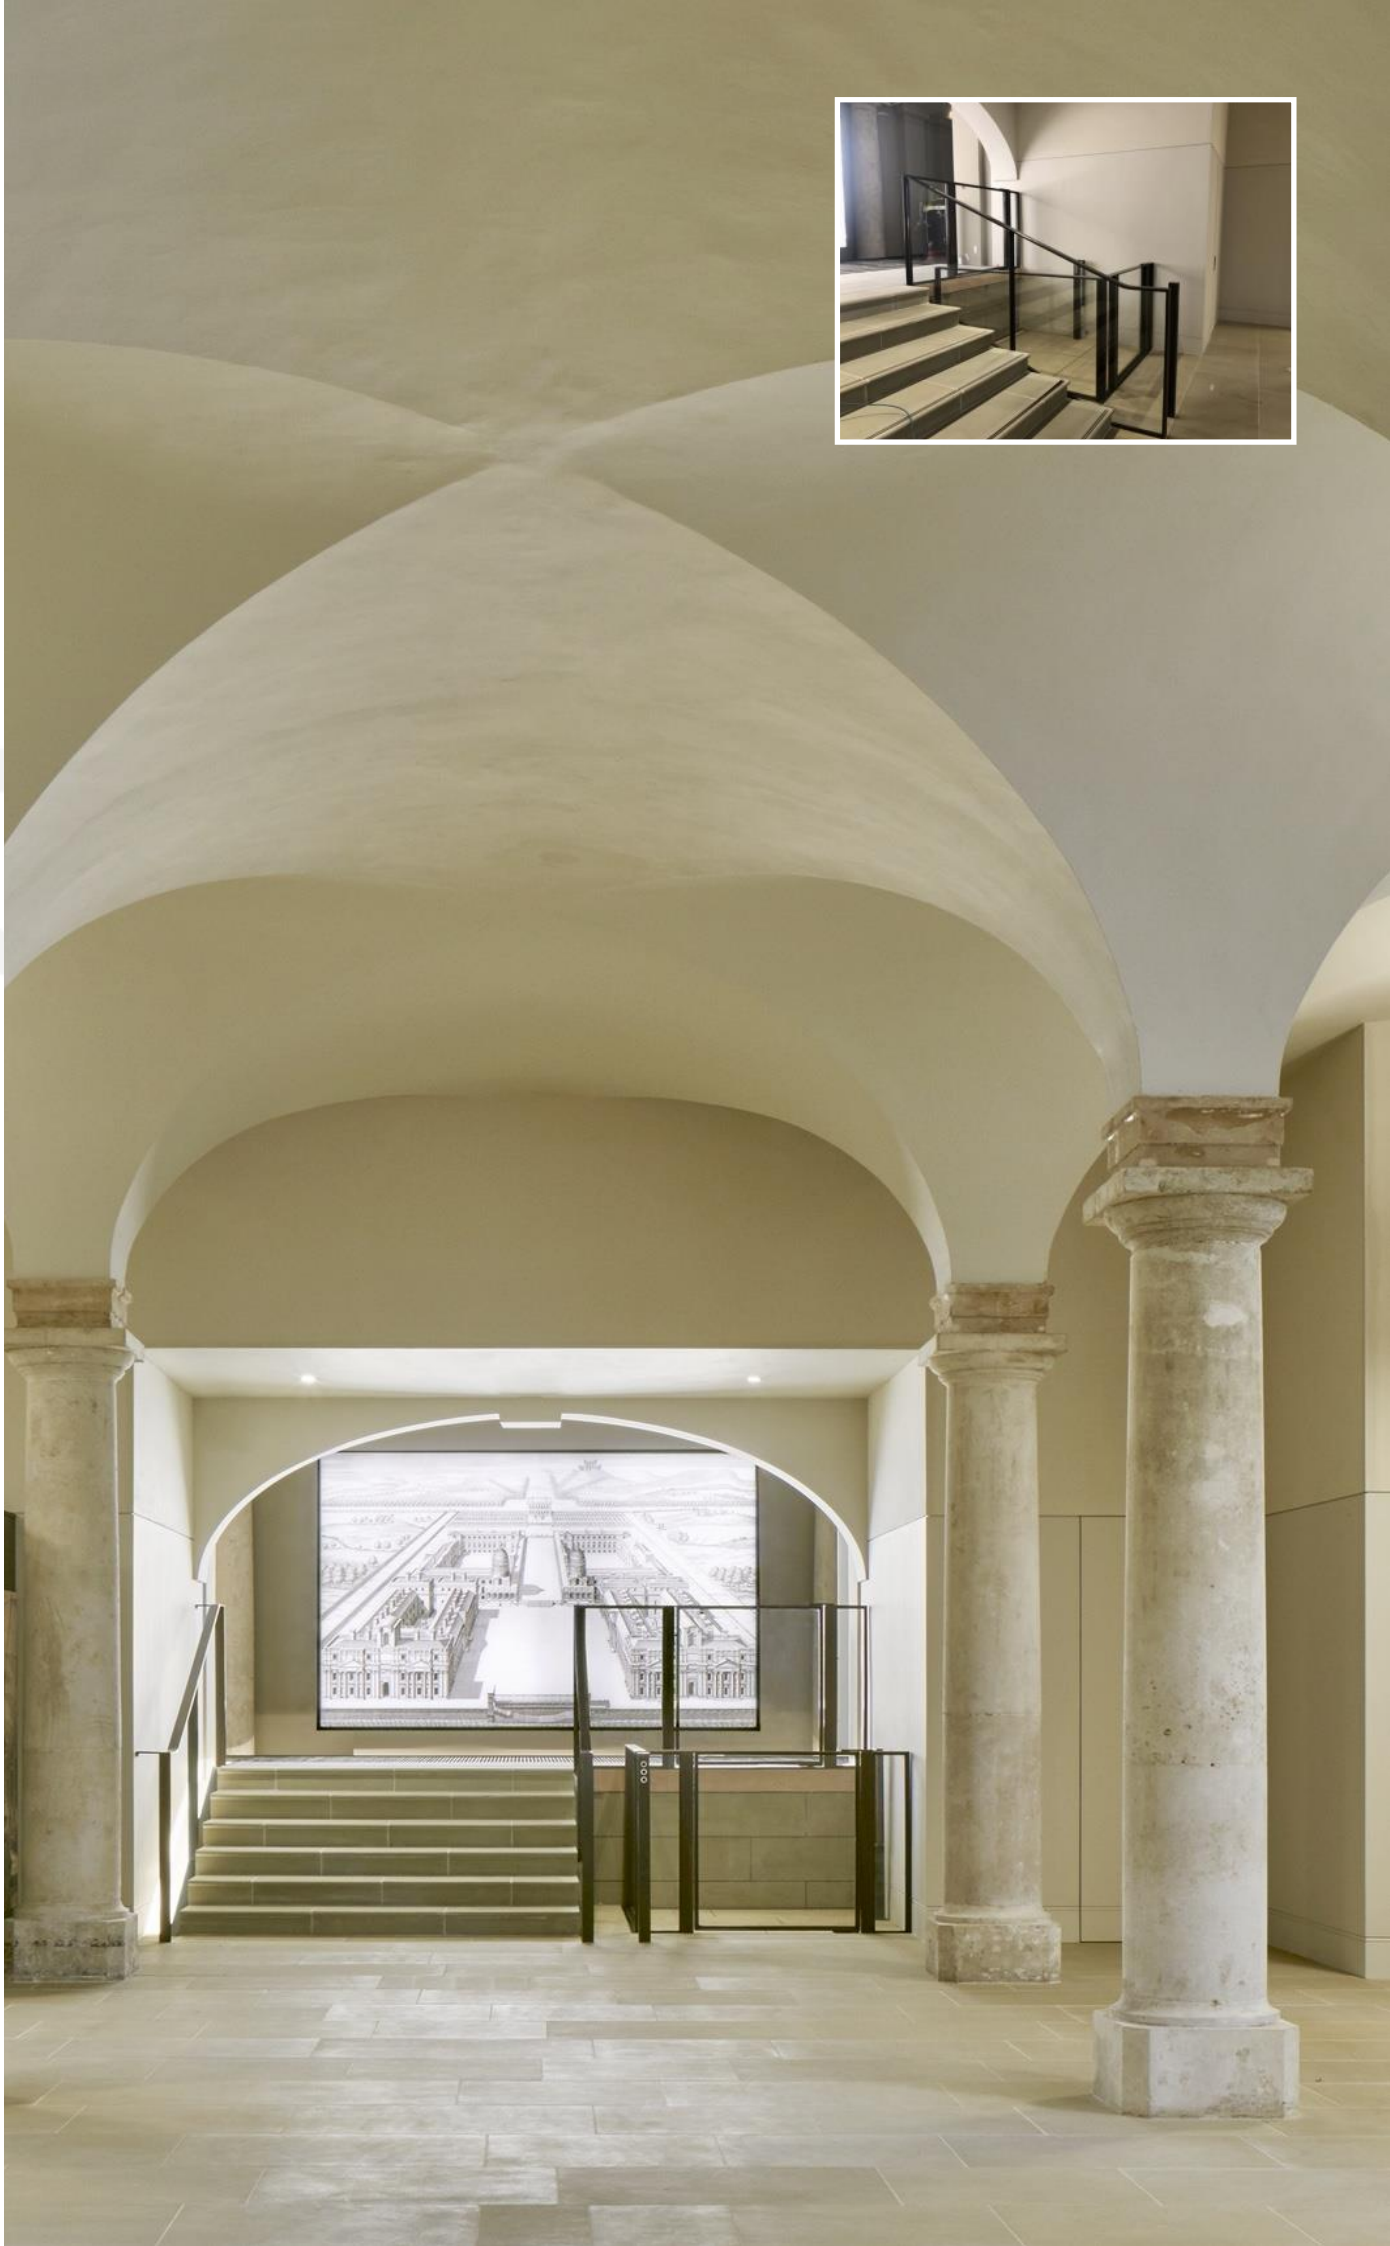

TV personality and Pointless presenter Alexander Armstrong at the grand unveiling.

Located at the world famous Lit & Phil library in Newcastle this was one of the first public buildings in Britain to allow entry to women! The theme of allowing access for all has continued with the installation of an Autograph TLD2000. The lift which is located in a very busy intersection is shielded by an etched glass screen.

LiftHaus

Exquisite hand crafted oak. Stunning workmanship to complement beautiful architecture. Why mask a platform lift when it can be hidden in plain sight. A wonderful example of creative thinking by our brilliant team.

Platform lift Couture

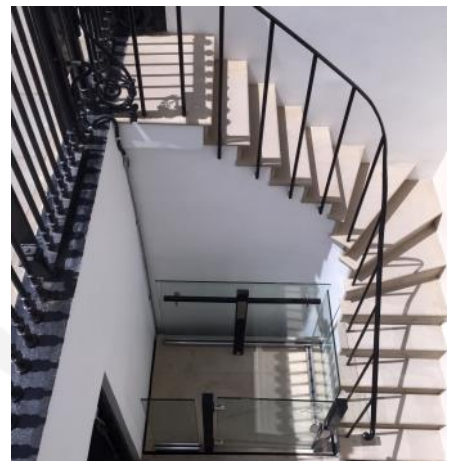

Situated in the heart of London's Square Mile this Heritage platform lift has spearhead finials and railings replicated from existing street side balustrades to ensure that the lift is as discreet as possible. The platform is finished with matching York stone and the rear barriers and upper gate are in frameless glass. The platform has sheet steel scissor protection and bi-parting gates

LiftHaus

Lyfthaus

Lightwell basement platform lifts are a thriving market sector for Lyfthaus as property owners choose to make better use of this valuable space. To passing pedestrians these lifts are virtually invisible. Street level balustrades are adapted to form interlocked gates. Flooring can match adjacent surfaces.

All Lyfthaus Collection platform lifts are designed for constant operation. No matter how busy the traffic flow your lift can handle it! This lift is installed in a large office complex with many disabled employees and visitors.

Lyfthaus

A nautical theme has been introduced at Goodwood's incredibly scenic racecourse in the South Downs. The theme continues on the platform lift where we have included yacht style barriers finished in white.

Lylthaus

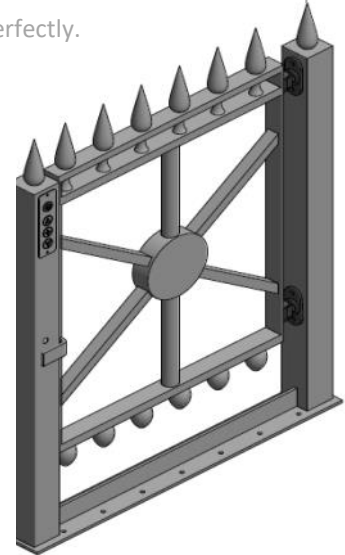

Lyfthaus

We rise by lifting others

Lyfthaus have installed beautifully discreet lightwell lifts into the basements of historically sensitive buildings in all central London boroughs thus setting a precedence for future planning consent. More recently contracts have also been secured outside the capital in Edinburgh, Bath and Dublin. Designers and developers recognised the importance of this valuable subterranean space and the installation of a Lyfthaus platform lift ensures it can be utilised and enjoyed by all. Lyfthaus adapt the street level balustrade and sympathetically convert a suitable section into an interlocked access gate. The lift itself is laid with platform materials to match other design elements and is finished to complement its surroundings perfectly.

Original gate design drawing

- BS6440/2011 and EN1570.1 compliant
- Low profile, single, double and triple scissor mechanism lifts to heights of 3M

- Three year parts and labour warranty
- Prestige marketplace specialists

The Lyfthaus logo is written in a large, elegant, cursive script. The letters are interconnected and have a soft, flowing quality. The logo is positioned to the right of the main list of features.

Like all pioneers, the Lyfthaus founders' approach to platform lift design had to be unique. To be different. They wanted Lyfthaus to stand out by standing for something different and for many years the company has done just that. Year after year, new platform lifts and refreshed designs have been introduced, each as impressive as the last, keeping pace with continually evolving architectural trends. As time has progressed a company style has emerged and now the Collection created by Lyfthaus of Cambridge is internationally recognised as the open aspect platform lift industry's leader in stylish contemporary design, technical innovation and bespoke adaptability. All proudly made near Cambridge, England.
